

# Update Version 8.0

Available for all the "2D-3D Parametric plants"  
The update includes these new options:

## 1 More realistic branches

Using this option, you will have a smooth path of the trunk and the branches; with this option you will have a more realistic model also in close-up views

## 2 Texture improved

The textures are now applied with a more realistic method both on branches and leaves

## 3 Trunk enlargement

Now you can control in percentage a different dimension of the branches

## 4 AC 16 compatible

The object are now compatible from Archicad V16 to the current version

**BIMX Compatible**

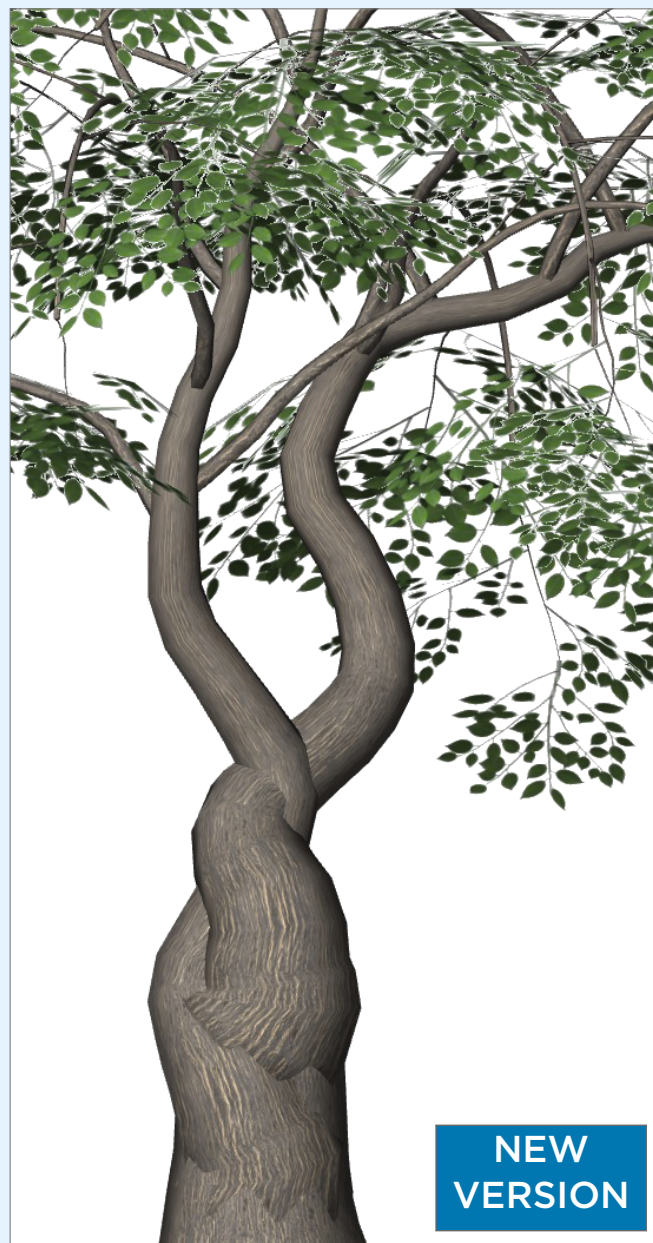

The new version is available for free download for all the clients that have already bought the objects, using the same code the used for the purchased version.
